1907 CATALOGUE
THE DUNDEE NURSERIES
D. HILL
BROWER OF
HARDY EVERGREENS AND ORNAMENTALS
DUNDEE, ILLINOIS

Office of the Illinois State Entomologist.

Urbana, Ill., Sept. 21, 1906.

This is to certify that the growing Nursery stock and premises of THE DUNDEE NURSERIES (D. Hill), situated at Dundee, Ill., have been inspected by Eugene V. Bronson, a duly appointed inspector of this office, according to the provisions of an act to prevent the introduction and spread in Illinois of the San Jose scale, and other dangerous insects and contagious diseases of fruits, approved and in force April 11, 1899, and that no indications have been found of the presence of the San Jose scale or other dangerous insect or plant disease.

This certificate applies only to the condition of this nursery for the period ending June 1, 1907.

S. A. FORBES, State Entomologist.

We Issue a Large Illustrated
Catalog, Giving Prices on All
Large Size Trees.

Thirty-two Years in the Nursery Business.

In entering upon my 32nd year in the nursery work, I wish to thank my many friends and patrons who have made it possible for the business to grow. We have tried to uphold an honorable policy in all of our business dealings. We are this season better than ever prepared to handle your business.

THIS CATALOG.

This catalog is my agent. Read this description and examine the prices. We aim to describe the stock which we offer for sale in a truthful manner. If you do not find what you want, write to us and we will get it for you. If there is anything in connection with sizes and prices that does not seem clear, let us know, we are only too willing to explain. We want your business, we know we can please you. Give us a trial. All we ask is a chance. Our stock has pleased others, and it will please you.

Seed Beds. This is the Way We Shade Little Plants While They are Growing from Seeds.

A WORD ABOUT OUR STOCK.

Don't compare our nursery-grown stock with wild trees. We grow our stock from seeds. Some varieties are started from cuttings, while some of the choice varieties are carefully grafted in the greenhouse. Nursery grown stock is healthy. It is grown with an abundance of light. The parts form properly. Did you ever see stock sent out by some nurseryman, stock that was long and slender and very light, with only one long, straight root? Such trees are found wild in the woods. Nursery grown trees are not long and slim and light. Their roots have been made to grow and develop by being frequently transplanted. This stock when taken from our nursery rows and shipped to the purchaser, will grow. It has a stock of feeding roots that will

take hold when planted out, and put new life and vigor into the plant. Now choose for yourself which kind of stock you would rather have.

HARDINESS.

Thirty-two years in the nursery business has taught us that people demand hardy stock. Such trees and plants as will stand out unprotected during the long winter months, and not suffer from the effects. Trees that will not only live through the winter, but will be ready to start growing again when the warm spring day appears. People don't want stock that will be frozen back and partly killed every winter. Such trees don't give results, and it is money wasted to buy such stock. We grow hardy stock, and experience has taught us which varieties are best adapted to the different parts of the country. We have made it our business to find out which of our trees give the best results in the different states all over the country. If you don't know, and are undecided, ask us. It is our business to know, and we are only too glad to tell you.

PACKING.

The digging and packing of nursery stock is as interesting as knowing how to grow it. Have you ever received a box of trees, either fruit or evergreens, and did the stock look fine? Yes, all except the roots; they were cut short off just below the ground. The trees, no matter how strong and healthy, could not live with their roots cut so short. Therefore we try to impress upon our customers the importance of having your stock properly handled. Our stock is all carefully dug. If the trees come to the packing shed with their roots gone, they are thrown out. The man who dug the tree is asked to explain. There is no excuse for stock being spoiled in the above manner. Some one is at fault and our foreman sees to it that such mistakes do not often occur. After digging comes the packing. Our packers are all old and experienced hands, who have packed our plants for many years. The stock must be properly packed so as to arrive in a fresh, healthy condition. We use moss, lots of it, damp moss that will keep the roots from getting dry. We cleat the trees firmly into place so there won't be the slightest chance for them to come loose and shake about. Years of experience have taught us the best and most practical methods and every shipment is packed under the direct supervision of a competent foreman.

WE FURNISH PACKING MATERIAL AND BOXING FREE OF CHARGE.

We do not guarantee that all our trees will live, neither do we assume the responsibility after shipment has been placed in the railroad company's care. We do guarantee that all stock will be of the true variety and of the quality described. Mistakes will occur. Although we use every possible care, we ask that you call our attention to the same upon arrival of the stock, that immediate attention may be given.

PRICES.

We welcome a comparison of prices. Our stock is sold direct to you. We pay no agents' commission. You get the first and only price we quote.

Remember you are buying nursery grown stock, and do not compare it with wild trees pulled out of the woods and along river banks. Our prices are low, very low in fact, when you consider the quality of our stock. Our prices are low because we sell stock in large quantities. We grow evergreens by the million, and quick sales at reasonable figures has always been our policy.

TERMS OF PAYMENT.

All orders must be accompanied by cash, bank draft, express money order or postal money order. Register your letters containing money. It is not safe to send them through the mail unless this is done. Stock is furnished as follows: 5 at 10 rates; 50 at 100 rates; 500 at 1,000 rates. Remember, we furnish boxes, packing, moss, burlap, twine, paper, etc., free of charge and delivered to the station, after which our responsibility ceases.

FREIGHT OR EXPRESS.

Be sure to state the manner in which you wish your goods shipped, by freight or express. We use our own judgment when not advised by the purchaser.

FIFTY GREAT BARGAINS.

We send out with every catalog one of our "special bargain sheets." We have for a number of years offered our customers these bargain lots. They are all of best quality stock. Look them over, they will interest you if you intend buying trees. Our careful selection of stock has made a reputation for the Dundee Nursery. We will uphold this good name by giving our customers first-class, carefully-selected stock and fair and honest treatment. We are never too busy but that we can find time to give your questions our careful attention. It is a pleasure for us to give you the knowledge of our experience that has taught us.

PLANTING EVERGREENS.

The proper time for planting evergreens is in the springtime after the ground has become warm and mellow, or again in the fall after the season's growth has matured. Unpack your trees as soon as they arrive and plant them as soon as possible. Do not expose the roots to the sun and wind. If the weather and soil are dry, water well after planting, tramp the soil firmly about the roots.

TREES FOR EVERY PURPOSE.

We grow trees for every purpose. Read our description in the catalog and you will see the kinds we recommend for every purpose. Some kinds are grown for windbreaks, some for hedge fence and others for lawn planting. All are hardy and free from blight. We offer for sale seedlings and transplanted trees.

Seedlings are the young trees still in the seed beds; transplanted are those which have been taken out and replaced either once, twice or three times. Transplanting develops root growth, and makes a stronger, heavier-shaded tree.

EVERGREENS.

ABIES (The Fir).

Balsam Fir, for wind-break and shelter shield. Always hardy and a rapid grower. Does well on any soil and is a satisfactory tree. It grows fast while young and quick results are obtained by planting the tree.

	Each	Dozen	100	1000
Balsam Fir, Transplanted, 2½ to 3 feet.....	\$ 60	\$ 6 00	\$ 50 00	\$.....

SEEDLINGS.

“ “ Seedlings 6 to 8 inch.....	2 00	16 00
“ “ “ 4 to 6 inch.....	1 50	10 00

HEMLOCK (Abies).

Our hemlock trees are all good, well-formed plants. The tree is hardy and easy to transplant, not so rapid in growth as some others, but forms heavy plants when matured. This tree is fine for lawn planting and makes a beautiful hedge. All sizes over three feet are dug with a ball of earth, and tied up in burlap. This insures the life of the trees, as they seldom fail when handled thus.

DOUGLAS SPRUCE (Abies).

Take advantage of our prices on these varieties. Never before have we quoted such a low rate on this fine stock. The Douglas Spruce is hardy, very hardy; it grows fast. In fact it is the fastest grower belonging to the family.

It is easy to transplant, and will grow on any soil. Our stock of Douglas Spruce is fine. These trees cannot be bought of any other firm for double the price we ask.

	Each	Dozen	100	1000
Douglas Spruce, Transplanted, 4 to 5 feet.....	\$1 50	\$15 00	\$125 00	\$.....

RED CEDAR (Juniperus).

You all know the Red Cedar, because it grows everywhere, from far north to the Gulf of Mexico and it is a common tree over all our Western States. We sell many of this variety every year. It is high in price because it is so hard to grow from seeds, and the big demand makes it impossible to get a big stock on hand. It is a valuable tree for the West, as it is not affected by the hot, dry winds.

	Each	Dozen	100	1000
Red Cedar, Transplanted, 3 to 4 feet.....	\$ 75	\$ 7 00	\$.....	\$.....

“ “ Seedlings, 6 to 8 inch.....		1 00	5 00

Looking at the Big White Pines. This is One of the Fastest Growing Evergreens We Offer.

PINUS (The Pines).

The pines are such useful trees. How hardy, the winter never hurts them. And how fast they grow. Some pines grow two and three feet every year after they become established. For wind-break, shelter belts, or for planting out in long rows along the drive or fence line, the pines are always to be considered. Some kinds are highly recommended for lawn planting. What is more to be admired than a well-formed, evenly-branched White Pine? Its long, graceful branches covered with soft green foliage give a beautiful effect. Or the pretty little dwarf mountain pine, perhaps you have seen them growing upon the lawn, never get to be more than six feet high and grow as broad as they do tall. They fit in so well anywhere upon the lawn or yard, and are so easy to make grow. We can't describe all of the pines, there are so many and all have some good points, all are extremely hardy and grow very fast. The old reliable Scotch Pines for wind-breaks are always satisfactory. The pines are all easy to make live, and especially our good transplanted sizes. They all come up with fine roots and always give abundant satisfaction.

AUSTRIAN PINE.

Fast grower and hardy, good for all practical planting.

	Each	Dozen	100	1000
Austrian Pine, Transplanted, 2 to 3 feet.....	\$ 50	\$ 5 00	\$ 40 00	\$.....
Austrian Pine, Transplanted, 1½ to 2 feet.....	25	2 50	20 00

---	------	------	--	--

Austrian Pine Seedlings.

JACK PINE.

A good tree for the north and western states. This wonderful plant will grow and thrive on the dry, sandy soils where it seldom rains. The government is planting many thousands of this variety on the barren sand hills of Nebraska and other western states. They plant the Jack Pines because they will live and grow where others might prove a failure. Rapid in growth and always hardy, forming fine timber trees.

	Each	Dozen	100	1000
Jack Pine, Transplanted, 18 to 24 inch.....	\$....	\$ 2 00	\$ 10 00	\$.....

SEEDLINGS.

" " " 10 to 12 inch.....			1 50	10 00

WHITE PINE.

Everybody is acquainted with the White Pine. This fine tree grows all over the world. It never gets too cold for the White Pine, and it is the fastest grower of all the evergreens, some White Pines grow 3 and 4 feet in a single season. We sell millions of these trees every year. We grow them in all sizes from three inches tall up to a big, heavy tree 7 feet high. Our stock of White Pines is fine, so fine, in fact, that we do not think that you can buy stock from any other nursery that will equal our trees. Thrifty, stocky plants with plenty of roots. That's why they grow, because they've got the roots. We transplant our stock and give it room to grow. Don't compare this stock with trees grown thick and crowded, until they have grown tall and slim, and have such poor roots that they could not possibly live when replanted. We don't grow our stock like that, we give the trees room, they are transplanted and root pruned, and they live and grow when planted out. That's our specialty, growing hardy evergreens. Plant the White Pine anywhere, it is good enough to grow on any lawn, and for wind-break it can't be beat.

White Pine Seedlings.

SCOTCH PINE.

A few thousand Scotch Pines. This seems to be one of the most popular evergreens for wind-break planting.

Look at the picture of those trees. They are the old reliable Scotch Pine. The kind we grow and ship all over the United States and Canada. We can safely ship you Scotch Pine any size. Notice how healthy and strong these pines grow. They give quick results when planted out. They grow so rapidly that a good, heavy screen or wind-break is soon formed, and they are always hardy. Buy hardy trees, it doesn't pay to plant tender varieties. Hardy trees stand the cold and wind, and don't scald in the summer. How much in actual dollars will a good planting of evergreens add to the value of your place?

Think it over. Our plants don't cost much, and when you order from the "Dundee Nurseries" you get first quality stock. Thirty-two years in the nursery business has taught us how to grow good trees, not only grow good stock, but dig and pack them so they will travel any distance and arrive in perfect condition. We use plenty of moss.

Scotch Pine Seedlings.

AMERICAN ARBOR VITÆ.

The thick, heavy growing American Arbor Vitæ make a good plant for many purposes. This tree doesn't grow so fast as the pines, but grows so thick and heavy that it is well worth planting, especially when mixed with other faster growing kinds. This is the plant that is used so much for hedging. Always hardy and can be sheared into any desired form. We make a specialty of Arbor Vitæ Hedge Plants. And we sell them cheap. Compare our prices with those of other nurseries and when you consider the quality we furnish, you will find our prices are low. Our stock of American Arbor Vitæ is fine, and we supply them in any size, heavy, bushy, well-rooted stock.

PICEA (The Spruce).

We have an especially fine stock of the different spruces. Our transplanted sizes are extra well rooted, heavy stock. The spruces can be used for any and all purposes. They are rapid in growth and always hardy. We call particular attention to our Black Hill Spruce. This variety has never been known to winter kill or even scald. The White and Norway Spruce are rapid growers and are both easy to transplant.

BLUE SPRUCE (Colorado).

A Few of Our Choice Blue Spruce.

We take special pride in our stock of this wonderful tree. In habit of

growth it is perfection itself. Branches from the ground up and is covered with the brightest of blue foliage. Look at the picture, see how the color shows and flashes in the sun. We have a stock of blue spruces in the different sizes and we do not think their equal for color and shape can be found in any other nursery. We dig all the transplanted Blue Spruce above one foot in size, with a ball of earth and tie in burlap. This method of treatment insures the life of the tree. Remember there is no extra charge when we pack the trees in this manner.

PURPLE LEAF MAPLE.

Our beautiful purple maples are one of the best lawn trees we offer. The rich blood-red foliage in the spring is attractive and beautiful. This tree is hardy anywhere in the United States. Transplants easily and is a moderately rapid grower, but it forms such a fine round top that one could hardly imagine anything more striking for a lawn tree. Our plants are all grafted and carefully grown and we ship nothing but first quality stock.

“ “ “ 6 to 8 feet.....	30	2 50	15 00

OAKS.

The oaks are becoming very popular as street and lawn trees. They do not grow fast, but they do form such noble specimens that they are everywhere in great demand. Never plant the oak in the fall, always in the spring. Cut back rather severely and mulch with rotted straw and manure. When treated in this manner the growth they make will surprise you.

AMERICAN LINDEN OR BASSWOOD.

This tree is well known to most people. It grows over the entire country and is a most desirable tree. Rapid in growth, in fact, few trees grow faster than the American Lindens. For this reason it is a very popular plant. Our demand for this variety is so great that we offer them in all sizes. Our stock is fine, such clean, straight trees with heavy, well-formed stems and tops. And all have been transplanted from one to three times and have developed fine roots.

AMERICAN ELMS.

This tree needs no description as it is so well known to everyone. We merely wish to call your attention to the fact that the Dundee Nurseries have made a specialty of growing elm trees for many years. Examine the fine thrifty elm trees just as they stand in the nursery row, ready to be dug and shipped. Those are the kind of trees we recommend for street planting. All fine, straight stems and the tops all at an even height. These especially treated trees are from two inches in diameter up to four inches. Such stock is sure to give satisfaction, they are the best that can be grown.

HEDGE PLANTS.

For hedge planting we recommend especially the American Arbor Vitæ and Norway Spruce. They are hardy, rapid in growth and will stand severe shearing. Our Purple and Green Barberries make very desirable hedges. The barberries are covered with thorns and for that reason they can be used where they will act as a fence as well. The barberries grow fast, so fast that it is surprising how short a time it takes them to form a good heavy hedge. We can furnish any hedge plants you may desire, write to us if you don't see them listed here.

Seedlings for Forestry Planting.

Plant Hardy Catalpas and Black Locust for posts and timber. Two of the fastest growing trees we have to offer. The wood of the catalpa and locust is valuable, and it only takes the seedlings a few years to develop into good, big trees. Look at those seedlings as we pull them from the rows. Don't they look strong and healthy? Stock like this will live and grow. Notice the well-formed roots, and then think of the stock you have seen pulled from the woods with one long, slender root. Which will you buy? We sell you

Sugar Maple. Black Locust. European Larch. Hardy Catalpa.
See the fine roots on these nursery-grown seedlings. Such trees live and grow.

strong nursery-grown seedlings at the same price you can buy wild plants, so don't make a mistake, get the best and you will get results. We pack all seedlings carefully with plenty of damp moss. No extra charge for packing.

FRUIT TREES AND SMALL FRUITS.

First quality fruit trees, that is what we have to offer you. We ship nothing but first quality stock. It does not pay to plant poor, sickly, half-dead trees. They may live, but you will never be satisfied. Get the best. Our first quality fruits are the best. They are trees selected from thousands; they are the strongest, heaviest and the best from the entire block. Such trees live and grow, you get results. Look over the following lists, you will find all of the reliable and standard varieties, such as we care to recommend as being good to plant. In apples we have a few thousand first quality selects, heavy grade trees. In some varieties we can select trees from 1 to 2 inches in diameter, trees that will soon be ready to bear fruit. We dig and pack this stock without extra charge. Order these large sizes at once, they won't last long.

	Each	Dozen	100
Bush Honeysuckle, 3 to 4 feet.....	\$ 35	\$3 00	\$.....
" " 1 to 1½ feet.....	20	2 00

We offer some especially large, well-developed plants in this variety. They grow so fast and form such big heavy bushes that they are always in demand.

HYDRANGEAS.

	Each	Dozen	100
Hydrangea, 2 to 3 feet.....	\$ 35	\$3 00	\$.....
" " 1½ to 2 feet.....	25	2 25

This is the shrub that bears those big, white, showy flowers in the summer and fall. They hang upon the bush for a long time and gradually turn brown and red. We offer some fine plants of this popular shrub. It is the easiest of all shrubs to transplant, and should always be cut back severely every year, as this tends to increase the bloom.

ROSES = ROSES = ROSES

FIRST QUALITY SELECTS. That is what we sell to you. Good, well-formed plants that thrive and grow after being planted. Our First Quality Roses will please you. We know they are the best that can be grown. Don't try to compare our heavy, well-formed, field-grown plants with poorly-grown second and third grade stock from crowded beds. We offer the best ever-blooming hardy varieties.

CRIMSON RAMBLERS.

HEAVY NO. 1 CRIMSON RAMBLER that will grow and bloom the second year after planting, that is what we want to sell you. We have a fine stock of them and they are sure to give the best of satisfaction. The Crimson Rambler is a climbing rose, covered with the bright red flowers, all growing in big clusters, until the bush at times is entirely covered with bloom.

CRIMSON RAMBLERS, First Quality, Each.....50 cents

We offer the following list of selected field-grown roses. All are budded, ever-blooming varieties. We recommend especially the Paul Neyron. This is one of the largest of the roses, the flowers are bright pink, very large and fragrant, borne on long, heavy stems.

THE PRINCE CAMELLE DE ROHAN is a fine rose. Deep rich velvety red. The bush of the plant does not grow large and heavy, but it is such a free bloomer that it is very popular.

All First Quality Selected Roses, 25 cents each; \$2.00 per dozen.

ANNE DIE DIESBACH. Of vigorous growth; color carmine; rose large and cupped.

BARRONNE DE ROTHSCHILD. Robust and sturdy in growth; a good bloomer. Clear pale rose color.

CROQUETTE DES ALPS. A free grower and an abundant bloomer. Color, white; medium in size.

DUKE OF EDINBURGH. Color, brilliant scarlet crimson; large and full.

GENERAL JACQUEMINOT. An old, well-known variety, very vigorous and a free bloomer. Blossoms very large and a brilliant crimson color, producing splendid buds.

JOHN HOPPER. Large rose-colored flowers with crimson centers.

MARSHALL P. WILDER. A most beautiful rose, bright, cherry crimson color; large and full.

PAUL NEYRON. A vigorous grower, producing the largest flower belonging to the rose family. Color, dark pink, very fragrant, perfect buds, large and firm.

PRINCE CAMELLE DE ROHAN. One of the old, well-known roses. A very dark, velvety red color. Perfect buds; very firm, medium sized flowers.

CLOTH DE SOUPERT. A beautiful and attractive little rose; white in color, shaded with pink. An exceedingly free bloomer, making a very desirable variety for out-door bedding.

MOSS ROSE. A hardy, vigorous variety of rose, the buds of which are covered with a feathery substance resembling moss. A free bloomer, fragrant and very attractive.

BLANCHE MAREAU. A pure white moss rose; flowers produced in clusters. Well covered with moss.

PRINCESSE ADELAIDE. Red moss rose, an excellent bloomer. Flowers of medium size. Buds well covered with deep green moss.

CLIMBING ROSES (BALTIMORE BELLE). One of the most desirable climbing roses. Flower, very pale pink; a strong, rapid grower.

- Scotch Pine 3 to 5 feet each.....12½c
- White Pine 3 to 4 feet each.....20c
- Am. Arbor Vitae 3 to 4 feet each.....20c

The above trees are fine stock, two or three times transplanted, extra well rooted and will grow when properly planted. About 2,500 can be loaded in a car. We pack them carefully with wet straw and moss. These trees are suitable for windbreak and lawn planting, hedges, shelter belts and screens.

Write for further information.

Special
Offer

See your friends and neighbors, get up a club order--and get your own trees free. For \$5.00 I will send you six of the \$1.00 packages. For a club of any four of the \$10.00 lots I will send you free any one of the \$5.00 lots you may select. For a club of \$80.00 you will be permitted to select either from the catalog or Bargain lots \$10 worth of my trees free of charge, packed and prepaid.

Special
Offer

REMEMBER HILL PAYS THE FREIGHT EXCEPT ON NO'S. 51, 52, 53, 54

Should you receive more than one catalog, please hand it to a friend or neighbor. When ordering send the names of your friends and neighbors whom you have reason to believe would be interested in my stock. I will send you a nice little 1 foot Black Hill Spruce for your trouble, free of charge--except with mail orders--it is too large to send by mail.

D. HILL, Evergreen Specialist
DUNDEE, ILLINOIS.

50 GREAT BARGAINS
